This Journal will publish papers in universal algebra and lattice theory, and papers inspired by or having applications to these topics. Survey articles are also solicited. A special section of the Journal, The Mailbox, will publish short communications problems, new references, abstracts of papers accepted for publication in any journal, counterexamples to published results, short observations, and so on. Papers for publication in this Journal should be sent – preferably in triplicate – to the Editorial Office, Department of Mathematics, University of Manitoba, Winnipeg, Manitoba, R3T 2N2. The author should indicate whether he has any preference as to which member of the Editorial Board should handle his paper. Papers are accepted in the languages of the International Mathematical Union. However, the use of English or French is encouraged.
